MOVENTO

MOVENTO is the latest advancement in concealed runner technology. It brings together all of the features, innovations and benefits that Blum has developed since first manufacturing drawer runners in the 1960s.

TIP-ON BLUMOTION for MOVENTO is a solution which combines the advantages of both TIP-ON and BLUMOTION, for wood drawers. This combination ensures that drawers open with just a light touch, have a smooth running action, and a silent and effortless closing action.

TIP-ON BLUMOTION depth adjustment

NOTE: Using the 65.5632.US front gap template is highly recommended. Adjust left and right runner.

Step 1

Measure cabinet opening

Cabinet opening measurements are needed to determine drawer box size.

NOTE: In face frame applications, cabinet sides must be blocked-out flush with the inside of the face frame.

Frameless Cabinet

Frame Cabinet

Step 2

Preparing drawer boxes

Build drawers according to the specifications given for the MOVENTO runners you chose and the measurements determined in Step 1. Install appropriate locking devices and bore holes to accept rear hooks.

Step 3

Attach runners to cabinet

Using the mounting information given for the MOVENTO runners you chose, mount the MOVENTO runners in the cabinet.

Step 4

Insert drawers

Extend the runners fully. Place the drawer on the runners and close. The locking devices automatically engage with the runners. Make adjustments if necessary.

Step 5

Drawer removal

Squeeze orange handles on locking devices and pull drawer straight out and up.

Rear Notching

Dimensions

Drawers must be notched in the back to accommodate MOVENTO runners

Rear view

The notches must be flush with the drawer sides and bottoms

Option – no notching

Make the back panel shorter and extend the drawer bottom to the back of the drawer

Rear Boring

Dimensions

Rear view

Drawers require Ø6 holes bored on each side of the back panel to accept the hooks on the back of MOVENTO runners

Boring

- 1 Place template over the drawer side
- 2 Position template so that the center rib rests against the inside face of the drawer side
- 3 Set stop collar on Ø6 bit so that it will bore 10 (13/32") deep
- 4 Hold template firmly and bore hole
- 5 Repeat on other side

NOTE: Using the T65.1600.01 Concealed Runner Template is highly recommended

Locking Devices

Installation

- 1 Position the Ø2.5 drill bit into the extension chuck so that it will bore 10 (13/32") deep
- 2 Place template into the front corner of the drawer
- 3 Bore two holes and repeat on other side
- 4 Attach locking devices with #6 x 5/8" deep thread wood screws (606N or 606P)

NOTE: The mounting screws must go in at a precise angle and the locking device must fit flush to the drawer bottom to ensure proper function of the complete drawer system

NOTE: Using the T65.1600.01 Concealed Runner Template is highly recommended

NOTE: Drawer side material thickness may vary. Accurate measurement of drawer side material thickness should be used when calculating outside drawer width using the table below. Inside drawer width **must** equal opening width minus 42 (1-21/32") for MOVENTO runners to align and function optimally.

Calculating outside drawer width

For drawer side thickness	13 (1/2")

Simple, tool-free assembly

The TIP-ON BLUMOTION unit can be assembled tool-free

Reliable Function

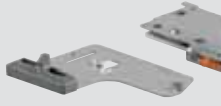

TIP-ON BLUMOTION remains functional at all times. Even if the drawer is manually pulled open or pushed closed, TIP-ON BLUMOTION works great the next time it's needed.

TIP-ON BLUMOTION for MOVENTO

TIP-ON BLUMOTION for MOVENTO provides flexibility by offering the TIP-ON unit in four different strengths.

Use the table below to select the appropriate unit and trigger by finding your drawer runner length and estimating the total weight of the drawer when loaded. A synchronization rod is recommended for all cabinet widths for optimal function.
